High school days choose your story mod apk

School Days is a free high school simulation game from Mdiekie on Mobile. As you can guess, the game offers you a very new location where you can do everything you like, including school activities, participating in social activities, as a fake student's love, etc. Overall, this game has a long process that requires you to accumulate your experience every day. And this is the most attractive feature of this game. In our opinion, its graphic design is poor. Therefore, its concept and story are real pluses for taking users to this game. Do you want to know more about this funny game? Let's learn more in our review of school days games! In storyIn school days game, you'll stay out of bed every day and every hour in real time, including getting out of bed and attending a scheduled class. And you also need to explore and interact with a city full of things and people. When you want to graduate from high score and school, you have to choose answers in 10 different subjects. Competitions are held in the hall on school days, where you have to answer questions to decide who is the best. Also, for this game you need to decide whether your day is full of joy or sadness. Thanks to the mechanism built into the game, you can make it your school. You can start with a student you created or changed all of the school staff and teachers. The open mechanism makes this game more engaging than ever, promising to bring exciting and unique experiences to players. What we like most about this game is you can do whatever you want in high school. If you want to pass the level, you need to be sure to be on time and not get into any fight. When your fight is down, your energy, you can't focus on the class. Also, there are three ways for you to get a high score. First, you can read books and find answers in books. This method will take time, and this is not always true. Secondly, you can get answers from another good student, and of course, you have to pay for it. And finally, can you cheat the answer from the gooly? Can you see it? It resembles your real life. Especially if you want, you can leave the class and kiss your girlfriends. However, there are no maps in this game, so you will be easier to get lost. So, do you know why this game is not for children under 17 years old? Simple gameplay In our experience, this game has so many commands and actions. But it is not difficult to use and control it. Instead, there is very simple and straightforward gameplay on school days. For example, you can press G for A, R for Run, P for pick-up, scramble for attack. It's not hard, but very easy to miss. Also, on school day you need more complicated tasks than hard time (gel sim) Offer more options for. For example, if you want to start a powerful battle, you can press runs and attacks at the same time. If you want to burn your opponent, you can press And run at the same time. One reason people love this game is that it's free. You don't have to pay to buy the game. You don't need to pay any money to install. And you don't have to spend any coins for levels or unlock a fun feature. We know there are a lot of games that come with free advertising. But you know, the manufacturer will always find a way to empty your pockets. For example, you have to pay your real money for fake customs, skills and levels. And that's why we say school days are different. You will not lose any coins or money. Graphics design is a big minus point of this game. Firstly, we do not deny that the scenes in sport are quite diverse. The ideas are also very authentic and vibrant. We think designers have tried to describe situations in real life in great detail. Yes, the graphics design of this game is fine in a range of volumes. But it is a big problem in terms of quality. First of all, all customs, hair colors and designs of characters are very old. This will make you feel like you are in the 90s. Secondly, game movements are not as smooth as you imagine. Frankly, we think it looks fake and annoying. The characters in the game have almost no facial expressions. We know it's just a 2D game, and we shouldn't ask too much. But compared to other 2D games like Hard Time (Gel Sim), school day graphics are an unusual weakness. While the graphics design is a minus point, the strength of this game's sound effects, some players may feel uncomfortable with the indescribable echo. But for us, it makes the game more real. You can find sounds almost every day in this game, including alarm clock, ambulance sirens, guitar practice at school. Of course, because you often face battle, it is indispensable for the sound of pain. These sounds are not complex or unusual. They are only normal sounds you can hear every day in your city. And you know, the simple is the best. The sounds of this game are a highlight. It will take your interest. In addition, it is straightforward to adjust or mute the volume. Overall, this game is an excellent simulation game. It faked almost everything that happened in high school. And that's why we said this game is fun, but very difficult. If you want to become a good student by getting more points, don't fight before the teacher. Is it the same as your real life? Also, if you want to talk about sound effects, we will score the game as 8/10. But if you want to talk about graphic design it is just 5/10. Its graphics are inferior and out of date. The character's hair, uniform and fabric in the game are all styled of 2000. And don't forget that this game is 17+ games. So, in this game, you have to fight a lot; You will need to experience a kissing scene. Please don't play this game in front of your child, and let them Don't let the view.
