## Cubecraft skyblock tips

Spaming dont jkjk bow is usually looked down and is a cheap way to knockback farm and win. But it is not forbidden, and there is an appropriate way to do it. But before that what is a spam arc? My definition of a spam arc is to rely solely on your bow for damage or knockback for a period of time... G Okay so I was on the 9th island and the 2nd island in the netherlands I knew some things that might be useful for other players so I decided to share some. I haven't actually played SkyBlock in Cubecraft so I can't help you unfortunately. Good luck completing the thread tho! Thank! I really want to get on with it but am tired so will sleep and will add a few things after I wake up. The reason I made this is because you can't see how much things would cost if you haven't unlocked it yet. It would also be nice if I could add some recommended mafia type farms and absolutely anything I could think of! Current Status: Just finished looting the swamp basement (clear all spawners) This screenshot was taken in the mafia farm (below) Statistics Some suggestions for the Game As a whole, the game is well designed in terms of balance The time it takes to plant trees should be a little shorter (4 days for dark oak) Add red stone support: this will make many farms much more efficient Less labor-intensive Add no support (the current maximum level of charm without quartz is only 5, and the only source of quartz so far is the quartz block of the savanna island, which is not renewable). Some Tips for new players 1. Use oak slabs to build if you don't mind aesthetics (probably the cheapest building blocks) 2. Most useful charm: Fortune 5 stone/iron axe. Increased luck will increase the yield of ore generators and plants. 3. Build xp farm: charm expensive advanced tools. Take advantage of mass spawning to produce XP quickly (which I built with 8 spawners (4 zombies, 4 skeletons) can reach lv30 in 3 minutes (with a smite 5 stone sword). 4. Make money by building a farm The initial game: Cocoa, remember to use water for collection to avoid consumption of endurance Mid game: Melon, You may need a good axe to the collection (the farm on the picture produces about 350k) End of the game: Not sure yet (the carrot farm works, which in the picture generates about 2M per collection, but it takes a lot of time to collect and replant everything, have not tried sugar cane) when you get a ton they will make millions easily and cheap with other good money sources
