The Pixels of the '80s were a memorable decade in music. Rock music is gaining new momentum, spreading its roots globally. A number of bands from the late 70s created new lines of music, pioneering new developments in sound. The hard rock and metal scene became prominent in the '80s, leading to whirlpash movements in bands that appeared in rock subgenres. Glam metal, a subgenre of heavy metals, reaches dizzying heights. Fiery high-pitched vocals became the focal point of hair bands and glam metal ribbons during this decade of lipstick and skin. Rock songs reach a wide audience. While mainstream rock bands did pocket big record deals with record companies, a number of indie rock bands also found cult followings. A number of rock bands toured extensively in the 80s, performing at sold-out venues. The AOR scene became overwhelming. Album-oriented rock, also referred to as arena rock and anthem rock, saw an increase in popularity with fans looking for softer, but more dramatic rock music. Rock songs became popular among young people around the world. In the US, radio-friendly bands have become very popular with audiences. Heavy metal continued its reign throughout the 80s, while soft rock and power ballads began to gain new ground. A strong emphasis on melodic elements, which are performed with choirs like the national anthem, became a distinctive voice in the rock ballads and electric ballads of the decade. The nuances of soft rock (interspersed with hard-hitting ballads) give these rock love songs a unique identity.
