According to beta game screenshots and the game code, Rockstar at some point planned to allow the player to have war with all the gangs in the game. But in the retail game the player would only be able to take over Ballas and Vagos's. This modification unlocks gang wars with all gangs (even the unused ones, if any modification makes use of them) so that the player can literally take over an entire state. Because SA does not load ASI files by default, you need an ASI loader. In case you don't have one (if you use any ASI plugin such as CLEO, you can skip this step), you can download a decent loader here: The rest of the installation is easy as pie. Just extract archive content to your SA directory and that's all. Make sure you check INI! I mean, what was the point of doing all the missions for Cesar and Woozie, then to be attacked by the same gang that you helped? /mysterio89 commented over 5 years ago:I downloaded SA Savegame Editor 3.2 and why I need jarfx programs for this ?? QUESTION is -&gt; why do I have to download this program wich " open .jar " file and wich is in the save game folder I saw on youtube just instalation and nothing else ... no jarfx or java program for save games instalation OGTeto commented over 6 years ago:s2n vanish, how do you change the positions of gangzones? I activate GANG9 and GANG10 so I want to put them where I want and I do not know any mod or script to do it s2n vanish commented over 6 years ago:Unfortunately, my game crashes after I give aztecas gangs more territories. But overall great courage! Quietly commented over 6 years ago:That's how R\* did it, the stock game has no Mafia territories. Mod is not adding any territories, it just marks them on the map and allows the player to take them over.
