Mutant creatures mod for minecraft pe

NEW Mutant Creature Add-on adds 9 mutants in Minecraft Bedrock with incredible power. If you are looking for add-ons to increase the difficulty of the game a few notch then this is a great option. This means that the world will be much more difficult because each mutant is much stronger than its predecessor. None of the mutants were affected by the fall or knockback damage. This is a very neat mod that adds a new dynamic to the masses in Minecraft. This allows for rare but random spawning of mutated masses. The mutation is physical and capable. Each new mutant is now significantly stronger and has a new, more powerful attack. They can be considered the boss mob now and will probably work very well if implemented in adventure mode games.
