The game is inspired by the historic Marine clashes of World War II. With a community of over 10 million active users, Warship Battle 3D World War II is one of the most played battleship games out there. The game is rated 4.2 on the Google Play store by over 600k users and new game updates are released almost every month. In Warship Battle, you must destroy enemy ships, earn gold, money and medals and upgrade your ship to advance further in the game. On your way to victory, you encounter a number of enemy vessels. These vessels include tanks, submarines, fighter jets etc. Gameplay The game is divided into episodes and missions. The first episode is 'Battle of Taranto (1940)'. In Mission 1, your goal is to reach the target area. Enemies within the targeting area are marked with an HP bar. You must upgrade the radar to increase the valid range. Several items can be purchased from the store, and you can use them for extra help in matches. The number of torpedoes or rockets you can use in each match is limited to the number of rounds you begin with. You can fill the rounds with the Reload Weapon element. The cost of ammunition used in a match is deducted at the end of each mission. You'll control and operate mighty era-authentic warships like HMS KGV Giant and HMS Bulldog, and you'll upgrade these ships with more firepower to them better and deadlier. You have opportunities to shoot torpedoes, machine guns and missiles to end your enemies. As the name suggests, the game is set in the World War II era. The game is extremely interesting, and the performance depends largely on how well you can control your warship in battles. You can make money by completing missions, but you can also end up lying about it if you shoot too many rockets and torpedoes. Please note that artillery costs money in warship battle.The controls of the game are based on two concepts. Tilt to aim and use directional buttons to navigate the ship. You can upgrade yours: Guns, Engine of the ship, Armour, Radar, Torpedoes, andAircrafts.When you destroy enemy ships, some of them provide medals, money and other items. Collect these items as they come to very useful during the game. Why do I need Warship Battle Mod Apk? You can download Warship Battle 3D for free from Play and App stores, but it's a big catch.
