This hack will automatically end the vote and no one will be ejected from the plane. 4. Transfer meeting in case you want to move to the meeting without pressing the emergency meeting button or reporting the corpse, you can use this move-in meeting hack. It will automatically start the meeting from anywhere on the map without even wasting the emergency meeting count. 5. Unlimited Emergency Meetings Unlike the Move in Meeting hack, this hack will give you an unlimited limit of emergency meetings. You can move to meetings at unlimited times, but the only condition is that you'll need to press the button while, in the move meeting hack, it automatically starts the meeting without wasting the emergency meeting count. Unlimited Emergency Encounters Hack 6. No meeting cooldown Each time the meeting ends, there is a cooldown that must end before requesting another emergency meeting. You can remove meeting cooldown by using this meeting cooldown hack in Among Us. This hack is mostly useful for crewmates. 7. No port recovery time One of the most useful hacks for an impostor. Every time an impostor closes the door, it is closed for some time and once that time is over, there is a recovery time that must end before closing the same door. No Door Cooldown Hack Using this hack, you can close the doors without even thinking about the port recovery time. There will be no recovery time for doors and you can close the same door whenever you want. 8. Force All Enter and Leave Vent This hack is a bit risky and the cheating detection system between us can kick you out of the game. With this hack, you can control other players' movements by forcing them to get into air intakes and get out of it like an imposter. The hack will apply to all player movements, which makes it more fun. 9. Sabotage lights Using sabotage light hack, you can drastically reduce other players' vision. It will be difficult to play as the lights will be turned off. Even if someone tries to fix the lights, sabotage will occur immediately over and over again. So, if you are an imposter, you need to try this hack. 10. Repair sabotage Using this hack, you can repair any sabotage mission created by an impostor. One of the most useful hacks for crewmates. Just activate this hack whenever an impostor creates a sabotage mission, immediately will stop the repair and will not be repair it manually. 11. Tor top distance You can increase your vision of the character using this torring distance hack. You can extend the distance from 0 to 15. If you pass the torr top distance to 15, you will be able to see much more than a normal view. In the case of the crewmate even if the impostor still sabotages the lights you will see Vision Hack 12. Close Doors You can close specific ports or all ports you want to close and it will be permanently closed using the closed door hack and will be closed until you turn off this hack again. It is one of the best hacks because you can trap anyone in the room by closing the doors permanently. Close doors and other hacks 13. See Ghosts + Chat Active players can't see ghost players or their chats that have been kicked out of the plane or dead. But using this hack, you can see the ghost characters and even their chats. So you can easily know which dead players are talking to each other. 14. Complete tasks If you get tired of completing all tasks as a crewmate, you can use the full task hack that will automatically complete your mission with just one click. It could be a risky hack because the cheating system can detect it and you may get a ban from the united server. 15. Spam Text During Killing Have you ever noticed the animation of killing every time an impostor kills a crewmate? Only kill animation occurs, but now you can spam custom text every time you kill someone using this spam text hack. You just need to enter the custom spam text in the spam field and tap the Spam button to start hacking spam text. Now, every time you kill someone, custom spam text will appear to them. 16. Vote Adjuster Let's say you're in the emergency meeting and other players have decided to vote for you and kick you out of the plane. Well, you couldn't do anything in that case, but using the vote adjuster hack, you can adjust the vote and vote whatever player you want. Vote Adjuster Hack This hack automatically generates the chosen player even if other players don't want to vote for the chosen player. It is one of the useful hacks during emergency meetings. 17. Speed Hack You can change your player's movement speed from 0 (normal) to 15 (higher). This hack will only change your player's speed and will not apply to other players. Just choose any movement speed and the hack will start working automatically. Speed Hack But I would advise you not to use this hack because other players may notice your character's speed and therefore can quickly conclude that you were using the speed hack and eventually kick you out of the server. 18. Always an impostor Always an impostor hack is one of the coolest possible hacks in the game. Using this hack you will always be an impostor in the game. Sometimes it doesn't work, but most of the time you'll be an impostor in the game if you use this hack. No need to cancel missions or other kinds of things. Just activate this hack and you will win all the game rounds directly. 21. Random colors, hats, skins, pets You can try this hack just for fun. When you activate this hack, each character's colors, hats, skins, and pets will change all the time making the game more fun. But I would advise you not to try this hack as it is a bit dangerous and the cheating system can detect it when you activate this hack. 22. Change everyone's name You can automatically change each player's name in the game whenever you want using everyone's name hack. The only downside to this hack is that so far there is no feature to change just a particular player name. If you use this hack, each player's name will be changed to the same name. But be sure to activate this hack when you are a host player because in case less then the cheating system can easily detect this hack and can kick you out of the server room. 23. Unlock skins, pets, hats Are you fascinated by skins, pets, hats and special clothes? Well, these clothes and other skins can cost you money for use. But using the unlock hack, you can easily unlock everything in the game that requires money to unlock. 24. No ads bothered by ads popping up while entering the server room again? This hack will help you save tons of your internet data by deleting ads to appear while joining the server room again. More Misc Hacks 25. Confirm ejected You can change the confirmed expelled settings using this hack. The ejected confirmation settings can only be changed by the host player before starting the game, but now using the confirmation ejection hack, you can change the settings whenever you want. This hack will make sure that when a player is expelled from the plane by voting, the system will not show them whether he was an impostor or not. 26. Long kill distance Using this long-distance kill, an impostor can easily kill crewmates even if their crewmates are a long way from the impostor. It is one of the best hacks for an impostor as they can kill anyone from a long distance and win the game by activating this hack. 27.
