Diastolic blood pressure range pediatric

It is the lower number indicates the pressure in the arteries when the heart rests between beats. In a blood pressure reading, such as 120/80, 80 is the diastolic number Related FAQ: Are there signs or symptoms for pulmonary hypertension? How is pulmonary arterial hypertension diagnosed? How old is the youngest diabetes patient? * Content is not intended to be a substitute for professional medical advice, diagnosis or treatment. Always seek the advice of your doctor or other qualified healthcare provider with any questions you may have about a medical condition. The normal range is usually 80 or less. But readings between 80 and 89 remain normal but higher than ideal. Related FAQs: How to treat headaches at home? What is pulmonary hypertension? Is high blood pressure highly correlated with snoring? * Content is not intended to be a substitute for professional medical advice, diagnosis or treatment. Always seek the advice of your doctor or other qualified healthcare provider with any questions you may have about a medical condition. The normal range is usually 120 or less. Related FAQs: How to treat a headache? How to treat headaches at home? Will high blood pressure cause brain bleeding? * Content is not intended to be a substitute for professional medical advice, diagnosis or treatment. Always seek the advice of your doctor or other qualified healthcare provider with any questions you may have about a medical condition. Crdjan/iStock/Getty Images Normal blood pressure is less than 120/80 millimeters of mercury, notes Johns Hopkins Medicine. In adults, a normal pulse rate ranges from 60 to 100 beats per minute. A blood pressure reading has two components, systolic blood pressure and diastolic blood pressure, explains Johns Hopkins Medicine. Systolic blood pressure, the top number in a blood pressure reading, is pressure in the arteries when the heart muscle contracts. Diastolic blood pressure, the lower number in a blood pressure reading, is pressure in the arteries between heartbeat. Pulse is a measure of the number of heartbeat a person has every minute. The pulse rate fluctuates with physical activity, emotional stress, injuries and diseases.
