## Puffin web browser pro

Puffin Browser Pro costs \$4.99 on Google Play, you might consider downloading this web browser for free on APKMODY. Table of Contents [Show]The namePuffin Browser ProPackagecom.cloudmosa.puffinThe operatorCloudMosaSudently, Puffin Browser Pro is not a prominent web browser like Chrome or Mozilla Firefox. But this is a quality web browser. Delivers incredible performance with superior data processing and viewing speeds compared to Chrome and other web browsers. With CloudMosa's leading cloud technology, Puffin Browser Pro deserves to be the default web browser for your Android phone. Puffin Browser Pro is a paid web browser, you have to pay \$4.99 to download it from Google Play. But the browser already has hundreds of millions of users, with tens of millions of users using the paid version. Why do people choose Puffin Browser Pro? Let's take a look at some of its outstanding features through the section below the article. The ultra-fast web browserPuffin Browser Pro was developed by CloudMosa Inc, a U.S. technology company. The head of this company is Shioupyn Shen. They tested encrypted cloud technology to develop the Puffin web browser, and it's great, it delivers incredible performance. The Puffin browser loads pages, displays content, media files, and Javascript faster than regular browsers. The only thing, when browsing the web, the user's IP is the IP in the cloud. Some websites consider it a proxy server. If Chrome users always complain about the web browser always occupying too much ram and resources on their phone, you never experience the same situation when using Puffin Browser Pro.Protect your data from hackers Sometimes, we often choose to work in cafes to change the workspace. You must use public Wi-Fi points to browse the web and send data. This is a good opportunity for hackers to steal your personal information, because public wifi points don't have too strict security. Puffin Browser Pro will put aside your concerns. This web browser encrypts your data before going to the cloud. If you use the ind anonymity tab, the application creates a unique session when will be deleted as soon as you close the application or disconnect the Internet. Therefore, you can be sure that your device is not data stolen by hackers or installed malware. Save bandwidth by browsing In addition to the above benefits, when saving data to the cloud, Puffin Browser Pro helps users browse the web to save more than 90% compared to regular browsers. However, if you watch a video or get going, it consumes more bandwidth than usual. Anyway, it's enough for Puffin Browser Pro essential entertainment needs like listening to music, reading newspapers, browsing social media... With data saving mode, you can customize some photo and video settings to help your browser load faster and save more. Even if you connect via wifi, this mode still works as usual. If you don't care about bandwidth savings, you can turn it off in settings. Support gamepad and trackpadPuffin Browser Pro compatible with Adobe Flash, although the software stopped support this year due to a number of security issues. In addition, the browser also supports virtual gamepads and trackpads, allowing you to play Flash games smoothly and easily on Android devices. Trackpad is a feature of laptops, which helps you navigate the web, scroll through pages easily and conveniently. Desktop Mode Some websites provide a better user experience as you browse the web with your PC. With desktop mode, Puffin Browser Pro will help you browse the web like a desktop, even if you are on a mobile phone. No longer bothered by adsThe video ads, pop-up ads and dozens of types of ads on websites protect you annoying? No need to search for browser ad-blocking plugins in the same way you use Chrome, Puffin Browser Pro automatically blocks ads for you, in order to provide you with a smooth experience. Some features of Puffin Browser ProTheater Mode Fast Upload Speedteater Video Mode and Flash GamesThe Javascripts fast desktop mode and mobile browsingThe mouse and virtual keyboards Automatically delete all session history, cookies when using the indigmable tabsThe Puffin Pro Browser APK is free for AndroidWith a wide range of exceptional features and advantages, Puffin Browser Pro deserves to be the default web browser for Android phones You. It provides great performance and experience for users. Developed by leading experts who have worked at Microsoft and Google, they are always trying to improve this browser with the ambition of becoming the Number 1 web browser in the future. Although not as popular as Google Chrome, Safari, Mozilla Firefox or Opera Mini web browsers, Puffin Browser Pro still attracts millions of mobile users. This browser stands out for its necessary features of a mobile browser, simple and high performance interface. One advantage that users appreciate about Puffin Browser Pro is its ability to browse the web quickly and smoothly. According to the results of reference tests, Puffin Browser Pro has more impressive results compared to current web browsers in terms of website loading capabilities. In fact, it has the ability to load a website faster than Google Chrome and other popular web browsers. This is an advantage you may consider to download and use this web browser instead of your current web browser. What is Puffin Browser Pro? Puffin Browser Pro is a mobile browser developed by CloudMosa, a technology company based in the United States. In addition to the puffin pro premium browser, the developer also released a free version with almost full of the same features. For the paid version, the browser will integrate the most powerful ad blocking. The ads were completely removed, which is similar to the uc Browser.Puffin Browser Pro feature that was first released in 2010 and quickly attracted a loyal number of users. By using cloud servers, encoding multiple layers of data, and using intelligent data compression algorithms, the browser is able to make browsing the web faster and more private. In addition, Puffin Browser Pro also has advanced features such as the latest Flash integration, mobile data saving, gamepad and trackpad support to enhance the browsing and gaming experience. Family interfaceSi has used web browsers known as Google Chrome or Mozilla Firefox before, getting to know Puffin Browser Pro is very easy. The browser does not attempt to make a difference, on the other hand, it is designed to look like other popular browsers on mobile. This really benefits users if they switch from one browser to another using Puffin Browser Pro.When their device is not connected to wifi or mobile data, Puffin Browser Pro displays only a simple No Network message and a search bar at the top. Connect to the Internet to get started. At this point, the browser will switch to a full interface. The Speed Dial section gives you quick access to frequently visited websites. Below is the News section, which provides the latest news articles that are updated hourly. The 3 dots in the upper right corner of the family screen are also designed similarly to other browsers. Here, you can open a new tab, open an anonymous tab or access other browser functions. Saving mobile data One of the conveniences of mobile is that it can be used anywhere, even anywhere. However, the device cannot always be connected to wifi. Right now, one option that many people use is mobile data. The average price of mobile data is usually quite high. So right now choosing a web browser capable of saving data is essential. Puffin Browser Pro can help you do this effectively with the ability to cut data by up to 90% with a patented data compression algorithm. Not only that, the browser also allows users to customize the parameters to suit the needs of use. For example, if you want to see the image in a higher definition, you can drag the slider to the right in the Image Resolution section of Data Saving. Similarly, you can also adjust the streaming quality level. If you use an unlimited mobile data network, mobile data storage can be completely turned off. You can also choose which feature is always enabled, even if you use wifi. Typically, you can choose to cut bandwidth by default only when using mobile data. The Data Saving Parameters section will be displayed at the top of the configuration, showing the percentage of data cut, as well as the amount of data you used during the month. Puffin Navigator classified as one of the fastest web browsers today. Use cloud servers to process data. Therefore, sites with big data can load faster. If you use a strong enough wifi network, it will be difficult to see the difference in the speed of Puffin Browser Pro compared to other browsers. This difference will be more pronounced when using slow-speed mobile data. Improved browsing experienceSo you get bored browsing the web with a familiar mobile interface and then try switching to Desktop mode. This is a feature that most web browsers today integrate. It offers a better experience on certain websites. The developers of Puffin Browser Pro also add gamepad and trackpad features to make it easy to browse the web in this mode. If you switch to navigation using desktop mode, you have a better viewing space. But the contraction is that too much information displayed on a mobile screen makes it very difficult to read and control. Using trackpad is an effective way to solve this problem. The trackpad is designed to look like the laptop trackpad and the use is similar. Just swipe to move, click to click and swipe up and down in the right bar of the trackpad to scroll through the mouse. If you regularly play games in your browser, then the gamepad will make it easier for you to do so. You can also customize the functions of each control button. High securityThe security issue is always the biggest concern when users use the Internet. The use of users of a familiar web browser and not wanting to switch to another browser is also due to the concern that the new web browser is not secure, such as stealing user information or containing malware. Puffin Browser Pro is rated as completely safe. Data is encrypted prior to transmission to prevent spyware intrusion to steal user information. The app ensures the security of your device, even if you visit areas with a high wifi connection is not secure. When a user uses a browser, a will be created. When you exit your browser or disconnect from the Internet, that section is removed. Therefore, users can be sure that no malware or viruses can affect their device via Puffin Browser Pro. You can also use it in combination with Adguard Premium to provide the best browsing experience on Android.ConclusionPuffin Browser Pro is a fast and powerful web browser for Android and iOS devices. Developers are also constantly updating the latest versions of Flash to help improve the user experience. Puffin Browser Pro uses cloud server resources. Therefore, in addition to faster browsing speed, it also helps users save mobile data. If you're using a slow-speed Internet, you may have tried downloading it. It can help you get better and faster surfing experiences. More.
