Retractable crowd control barriers perth

Wall Mounted Retractable Barriers Crowd Control System is Australia's leading provider of quality crowd control products. We offer a wide range of cutting-edge products available in the industry to support effective queue management in business premises and events. Our products are successfully used at open-air festivals, live sporting and cultural events and corporate events. Our extensive product catalog includes: crowd control barriers, crowd control equipment, and rope alternatives. We can also provide you with rope racks, queue systems, door barriers, tensa barrier solutions, removable barriers, racks and retractable straps. Crowd control systems offer crowd control barriers suitable for specially designed configurations for internal and outdoor purposes. When determining the right queue management system for your event, important factors are factors such as the layout of the site, the type of event, and the predicted crowd size. High quality crowd control products We pay great attention to offering products that meet the highest standards of quality and durability. Our range of crowd control barrier products goes through numerous quality control checks to make sure you get the best value products in the Australian market. Innovative Security Features We deliver a uniquely designed range of retractable barriers, rope barriers and accessories that maximize the safety of all people at your event. We are particularly proud of our patented security features included in the design of our queue management products. The innovative integrated security cassette meets OHS

requirements. And, our tension barriers retreat at a safe speed to avoid causing bodily harm. A sustainable and cost-effective offering of unrivalled service, we prioritize the development of crowd control barriers and related products that are responsive and reliable and offer a long lifespan. We are so confident in the quality of our products really that we are proud to offer a 7-year warranty on all our barriers, throughout our range, from the economy to premium range products. Need an effective queue management system for your business, which is also the ultimate alternative to TensaBarrier? Crowd Control Systems has an extensive inventory of products to choose from. In countless situations, crowd management and queue management are essential to running a smooth and secure business. Whether it's controlling access to check-in at the airport, cordoning off a dangerous situation/environment or simply controlling traffic through certain areas you need the right equipment. Our fencing systems, such as the Crowd-I fencing system are ideal for pedestrian control where as our neata airport barrier is the answer to orderly control queues. We also have temporary solutions to deal with emergencies. Please review our website and contact us if you have any questions. Free permanent post that is portable with easy-to-use snap hooks to add 1-4 ropes. Rope. The 10.5kg it is sturdy enough to be stable with ropes attached, but easy to carry around and store. There are four color ropes to choose from with each rope 2 meters long, however other sizes can be custom made. Neata belt pillars come with a two meter retractable belt in a selection of seven colors. The belt pillar can be installed in-floor, surface installed or portable. You have a Flexi selection that can tilt up to 10 degrees if impacted. Slimline Portable has an 8mm low profile base and weighs 9.6kg overall. Made from 304 Stainless it stands at 950mm High. If your budget doesn't allow Highline or Slimline, then Econoline Portable Belt is the message for you. Made from 304 stainless and 900 mm, it weighs just 8kg and comes with a 2-metre retractable belt available in 7 colors. The Retracta-Belt 7.6m wall is used in warehouses to close sections for storage, order collection or secure loading of shelving. It can be screwed against the wall with a belt receiver clamp on the opposite wall. The belt comes in a range of four colors and extends up to 7.6 meters. It weighs 1.2kg. The Retracta-Belt 7.6m magna mount has a magnet in the polycarbonate body, so it will be fixed on a pallet of racks with a belt clip for extra strength. The retrapa belt extends up to 7.6 m. This is a temporary device that can be moved around easily. It comes in a range of four colors. The skipper cone mount receiver is used when the skipper's retractable tape barrier is mounted on the top of one cone and towards that cone, where it clips into the cone mount receiver unit. The receiver can take two skipper tape barriers, allowing a span of 18 meters. Made from anodized aluminum, it is made to the last and can be fixed on a cone with the provided fixing screws. Provided.
