Block hexa puzzle download

Block! Hexa Puzzle is a puzzle video game that is as optimized as possible for Android to become a highlight on your mobile phones and tablets. The game is created by analogy with all famous Tetris toys, but it has its own features that will not allow users of different ages to be indifferent to it - from the smallest to people of respectable age. Clear and easy to master gameplay will make it easier for you to get to know the game. Each figurine, consisting of a different number of monochrome hexagonal, resembling honeysopox, you need to find a suitable place. Each such figurine has its own color and a different combination of hexagons. Since the field fill in at first and the number of shapes is minimal, it may seem that the game is very simple. But in fact, the number of combinations will surprise every aroused player. The number of numbers who need to find their place is growing with each level. In addition, more often there are other figures, metal blocks, one field is divided into several fields (blocks) and other interesting complications. For each properly collected block, the player earns a certain number of points. There are no time limits in the game, so your result won't depend on whether you've been concentrated or distracted while playing. Shapes move by swiping, but you can only move them up, down, and side, but you won't be able to rotate the shape around its edge. The blocks you fill in won't come back either. To make sure that in your spare time определенное количество фигур и улучшить свой результат, подключение к Интернету необязательно. Играть в автономном режиме можно в любое время. Это многопользовательская игра, поэтому за первенство можно соревноваться с другими пользователями онлайн. Хорошей мотивацией играть в Blok!
