It is a complex built in a secret valley, dating back to the period of the buildings, as the Chamber Kingdom thawed into the original jungle, surrounded by towering ancient wood wrapped around, just a ray of sky through the sky, unsafe. Several towers and pillars collapsed, wandering walls tell the vicissitudes of life, and the towering ancient statues staggered together. Exposure to this hall actually didn't feel the hardest ruins, but more to emphasize the festive and sacred here. Eight knights full of armor, divided into two extremes, the quiet around the surprisingly quiet, time seems to have solidied, and suddenly! Command Of two camps or an X sword, or a bow and arrow, flocked to catch the battle, a heat that seemed to want to light up the air, the blood boiling. Each man can carry three kinds of weapons, so sword, ex and bow. Each type of weapon can be selected from two types of fire, ice and electricity, which are quite simple and clear compared to the most similar games. Weapons are very personal, with reasonable or even just as important as the personal skills of slaughter. Orthodox liver swords, a dazzling double axe fast, bows and arrows is the only long-term attack, but side effects are slow, once the most problematic

weapon. Compared to the familiar shooting game, cold weapons fighting closer, faster and more exciting, giving a very strong sense of freshness, but can't deny that control is very difficult, from the balance of battle to image perspective, are big challenges, such as their name and background, bar blood and courage and commendable, though not a perfect solution to all problems like personal sensitivity when the battle angle conversion and intrinsicity was once beaten, especially Rainbow, however, the thrill of a strong cut to kill, an astonishing big move of the storm's impact was enough to achieve a free fight for player space, the main goal, I believe will make a lot of crazy never bored. Compared to many students in the market pull off the seemingly role-playing masterpiece, wild blood that's pure action for the game has a very reliable backstory. The protagonist of the game is even the most recognizable of the Chinese actors knight King Arthur's main round table - Lancelot, an interception of the most aphrodisiac scene in the era of King Arthur, out of unlucky love, a mixture of majestic, sexual, betrayal, the fantastical story of many dramatic elements of war. King Arthur found his queen and Lancelot actually... In nice words is that the matter of love, to put it bluntly is adultery and, in fact, the likes of a palace in Medieval Europe is very common and in most cases we are filled with inefficibility however, King Arthur, king of the pride kings, who gave the buckle buckle of the green hat, still cannot afford to deal with it. Dark Witch Mohanna took the opportunity to open the door of hell with a view to punish him. The liberation of countless evil spirits, leading to the European continent of life, her hair out of control and out of control. Although the end of this war was not personally initiated by Lancelot, but because of him, as the most powerful Nate in the history of medieval European mythology, Lancelot must personally seal the gates of hell to deal with a ship, and even face the duel of rival Arthur! What really amazes me is that unlike the roughness of the name, it's a bit of a niche game, where the pursuit of detail is even more impressive than the blind display of As far as the image is concerned, limited by the size and function, the 3D scene of a mobile phone/tablet cannot be done in a single scene and the elements of a screen may not be too complicated. Therefore, vendors who challenge three-dimensional masterpieces often find myself in two situations: too stingy, inability to play, that is, blindly stacked, indulgent. Infinite sword type step by step is considered a coincidence, once many people have speculated that wild blood is infinite cutting, The cloned version, it really is worthless cottage products, but also it give up the actual performance of our concerns, this 100% fake Baohuan free viewing angle 3D action game, reflected at the road level, each level map is not a great format, the design is very smart, the edge of architecture, mountains and other elements are very high, making the whole scene a very deep sense of visual pressure is very powerful; The track design is also very delicate, each scene has open spaces, there is a long road, there are several interconnected doors, each of which is divided into several parts of the process, each battle is signed in part of the area, the next battle in another area, the scene opens, the player can go through the same area several times but in different directions, different points of view, the enemy is different, combined with the two, in the brain create much larger than the actual illusion, which is indeed the performance of a superlic skill. The game in total seven scenes, each with unique features, from the lush village to the festive forest cloth palace, snowy frozen years, will not make people the same feeling. The reflection of the building on the water, such as flowing waves, beautiful image, screenshot of about 3.4 M, double the size of the most similar games, in this case, stability is pretty good, the new iPad for the test machine, most of the process is off, the independent version of the week is finished, played battlefield number, no card machine, flashback phenomenon, but the body is a little warm, commendable. If the game is a bit surprising to me, is the use of minimalism, uncomplicated design of weapons systems and equipment, the two do not engage in huge skill wood, the value is very simple, weapons on attack crit (attack) speed, armor on the value of physical life (action) speed, you want to upgrade the assets, directly buy gold coins, blue bottle of blood flowers, buy gold coins, posthumous revival, waste gold coins are fine. There is naturally within the purchase, personal discretion of the internal purchase is standard black is: first of all, no money can only be used to buy or not play or have a low probability of things; Followed by not spending at least once through the plot, and I don't have to spend too much Brush. In this context, wild blood set in simple, gold coins can be purchased from a brush, in addition to two sets of outdoors (who have been hunting demons installed, yet not tested in detail the impact of offensive and defensive forces, seems mainly to improve or visual effects) and not too much equipment, pro-test does not spend money deliberately brushing off the case of wearing a week to get hard and normal can be reached regularly hard but after a few hours a little harder. , it is estimated that in addition to buying suits, the player should spend most of the money is the revival of the original full of it. Standard game cut kill flow, but not without cool brain, occasionally mixing with how hard it is not difficult to adjust the atmosphere of the puzzle, such as cut (or shoot) to make crystal color change and seal the same in order for it, and sometimes more than one; Open far after the road close to the door wrench, there are time limits and, due to recover, the late dark nail surface with a fire sculpture to spit on the wall is very annoying, but the basic process will not cause much lag. There are also a number of gold breasts in each level, which contains much more money than bottles and jars and regular breasts. There's locks on them. You must have the puzzles similar to Huarong Road before getting difficulty getting difficulty and have time limits, but the hardest on the initial level of Huarong Road, purely for fun, we can rest assured. Although a highly minimalist weapon system has given quite a few changes in the game, not just a multiplayer mode, the same single classification, the upper right corner can pass quickly, according to the various characteristics of the enemy, the battlefield of different environments using different weapons, skills, and the effect will change widely, whether it is multiplayer or single, it is important to play. The developers have not yet hesitated, and even designed some of the barriers in the ballista, allowing players in the axe gap can also cool a beach landing, thought exhausted. Taking into account the flat perspective conversion inevitably does not have enough flexibility, wild blood was designed and an attack system helps, the hero will automatically attack its nearest enemy, after the load can also slightly adjust the angle to enemy spurs, although not yet until fully intelligent, accuracy is also fine and, after upgrading the force of a weapon up, there will be a good use of a very stunning chopping effect. However, in the past, after all, cannot completely solve the problem of perspective, the action is too hot when the camera may not be fast enough over time, sometimes the landscape will be pulled too close, independent mode is the effect of perception at most, a multiplayer mode once it is not necessarily a disadvantage, but the main difficulty of the game is Where I think there is room for improvement as well as improving space, including the outcome of the story can be more exciting, multiplayer situations and maps can be richer, but heard this work is completely developed by the local team, all aspects of the performance had enough color, if there is no trace of disadvantages, it really keeps. In a word comment, grand bar blood without losing the meticulous, wild without losing the sophisticated, despite the Shin Ding action game, but everywhere revealing the mature style of factory build-up, it's worth a try! To try!
