

I'm not robot

Continue

There are many reasons you might want to download a video. You may want to watch it later when you have more time or share it with others in your home when they get home. You might want to refer it to research. No matter the reason, it is helpful to learn how to download videos from almost any website for free. The following steps can help you navigate the download process while using the online downloader. First, open your browser. Then visit websites like YouTube, Clipfish, or Dailymotion, sites known for hosting a lot of video content. Take your time and browse through some videos. Select the one you want to download to your computer or laptop. The type of video you choose doesn't matter. This may be a cooking tutorial, vintage cartoon, or music video. Next, you have to choose the web address of the video you choose. Usually, you just click on the address bar, and your address will be selected or highlighted. If this click doesn't select address text, you may need to use your mouse to highlight the entire address. You can also click the address bar and then try clicking again. You may have double-clicked the first time, which will prevent selection. The reason you select or highlight a web address in the video you selected in the last step is that you need to copy the address in this step. Highlighting allows you to do that. You can copy the text you selected by right-clicking on the selection and selecting copy from the drop-down menu. If you're using Windows, you can Do Control C to copy your selections using your keyboard. If you're using a Mac, you can press Command C to copy your selection. Next, you must go to your Convert2MP3 website. This website allows you to convert videos into various formats for download. In other words, it's an online video downloader. Read the site's terms to ensure that you download safely and legally. Convert2MP3 site is popular with many people who download videos and want to do it reliably and efficiently. Now you're ready to click the video link text field. You will find this on the Convert2MP3 website under the URL of the insert video link. You'll want to press the select format button located in the center of the page. This is a big step, so you want to make sure you hit the right field! Remember when you chose your video address and copied it? The address is waiting to be pasted. In this step, you'll paste the video address in the presented text field. You can right-click with your mouse and select paste from the drop-down menu. Your address must then paste into a text field. You can also use the keyboard to press V if you're using Windows or press command V if you're using a Mac. Now, you are ready to find and click mp3 mp3 MP3 is a compressed file that will contain your video. If you try to download a 30 megabyte video to your computer, it may take hours. By compressing the content into an MP3 form, you can efficiently download music videos in a few moments. For video, click the MP3 box. When the drop-down menu appears, select MP4. This file is perfect for your video content. When selecting an MP4 file, you can choose the quality from the drop-down menu that appears next to the MP4 quality tag. Remember, can't choose a higher quality than the actual video quality. Qualities such as 360p, 480p, 720p, or 1080p are common choices. If you share something to social media, you might want to choose 1080p. Now you're ready to click the conversion button. This will result in your MP4 download link from the video you selected. If you get an error message or if the site tells you to choose another video, you can try. If you get the same message, the downloader site may be undergoing regular maintenance. You can try converting and downloading your original video later. Hooray! You have reached the last step in the conversion and download process. Click the button that says download. The button should be located in the middle of the page and will be green. You may be prompted to choose a download location on your device where videos can be sent and saved. In most cases, after you click that button, the download will begin. Don't forget to save your newly downloaded content. While you can save Facebook posts to watch later, sometimes you want to download the videos you find in your feed. Whether it's a video on how to save while working on a project, or a funny video you want to share with friends, you can download Facebook videos from feed to device in just a few simple steps. How to download a video from Facebook using a computer This trick works only on the Facebook.com and will not work on the application, so you will have to go to Facebook in your browser, first. Then, find the video you want to download and right-click on the video. Next, click the View video URL option. A small box with a video URL appears. Copy the link and then paste it in the new window tab or address bar. Then, change the www at the address to mbasic. So, for example, if your video URL you'll change it to . When you're done, tap Enter on your keyboard. What this does is change the address to the basic mobile interface address, which will then allow you to download videos. If you do it right, the screen will look a little funny, like you're trying to see the app in your browser. Next, right-click on the video and select Open link in a new tab Menu. In the new tab, videos won't have Facebook extras like comments and like buttons. It's just going to be a video. From there, right-click on the video and select Save video as... from the menu. Then, save it to your computer as it usually would any other video or photo. Now you can play videos with any video player you have installed on your computer. How to download Facebook videos from the app If you don't have a computer, downloading from the app using your phone will need help. First, you'll need to download a third-party app to your phone that gives the Facebook app additional features. For this demonstration, we used the Friendly for Facebook app. Once the app has been downloaded, the app will ask you to log in to your Facebook account. Get in as usual. Then, the app will open Facebook and it will look exactly like you are using the Facebook app. Next, find the video you want to download. At the bottom of the video post you will see a small alien icon next to the share button. Tap the alien icon. From the menu that appears, tap Video Download... Options. That's it. The video will be downloaded and saved to your phone. Editor's Recommendations Saving Instagram videos isn't as complicated as it looks, if you have the right tools at hand. Instagram is very much about living in the moment and sharing it with friends and family. With a few taps, you can take a photo or video and share it with your followers. You can also browse photos and videos shared with others – but what if you like the idea of saving videos for viewing when you're offline, or just want to see them off Instagram? Instagram makes it easy to find and tag videos you might be interested in, but it doesn't offer the built-in option to download the videos you want to save for posterity. If you want to download Instagram videos, you will need to look to third-party tools to help you (just like if you want to upload photos to Instagram from a PC). And that's what we're seeing here. Whether you're using it on a computer or on a phone or tablet, there are a variety of options you can use to download Instagram videos. Here are some of the best (and if you want to give your feed a new look, we can show you how to turn on Instagram's dark mode). Save Instagram videos to your PC There are many websites that let you download Instagram videos, and they all work the same way. One of the easiest, slimmest, and most reliable, but DreDown. To take advantage of this site, you must first visit Instagram and load the videos you are interested in. Copy the URL from the address bar of your web browser, switch to the DreDown page, click Instagram at the top, then paste the URL into the text bot on the DreDown page. Press the DreDown button, wait for the video then download it. Other web-based services that work in the same way include DownloadGram and Download Instagram Videos. Save Instagram videos on iPhone Security restrictions imposed with iOS mean that downloading Instagram videos is not as simple as on the desktop, but still not very complicated - all you need is the right app. One option is Blaze: Browser & File Manager. Just copy the Instagram post URL from the Instagram app and paste it into Blaze. Next, you need to tap the download button, then select the option to 'Export video To Camera Roll'. Of course, you can also use any of the web-based options mentioned above if you wish. Save Instagram videos on Android For Android users, there are several options when it sings instagram videos, including using one of the mentioned web-based services. However, there are also apps that you can use to make things a little easier. One such option is Video Downloader for Instagram, a free app that does very much what it's called. Since the app is free, you'll need to place ads, but this is a minor distraction. Video Downloader for Instagram does an excellent job of explaining how to use it, but it needs to be summarized. Within the Instagram app, tap the three dots button at the top right of the post you want to save the video to and select 'Copy link'. Switch to Video Downloader for Instagram and select the 'Paste' option. That's all there is to it. It.
