## Call of craft blocky tanks battlefield 3

Page 2 MMORPG games are a real fever among internet users around the world. Several games are released every day. However, the vast majority have a very similar plot, making them very similar, changing only the graphics and small details. This fact causes some users to get tired of the story. The case of Nine Dragons is completely different. The game is all set with oriental details, as it takes place in China, and has as its main reference the most varied forms of Kung Fu. 9Dragons, as it is also known, has as its background the Ming Dynasty, including geographical points known all over the world, such as the Great Wall, and also has some true historical details. Nine Dragons allows you to choose from 9 different clans or as the name itself says nine dragons. Therefore, it is advisable to know everyone before choosing, since each one has unique features. In addition, they will show the side you will have to defend, because one side is in favor of the emperor, while the rest aims to strip him of power. Without firearms One of the differentials is the fact that there are no shootings. In 9Dragons all fights are unarmed. In it the most important thing is to know how to hit your opponent well. One of the negative points of the game, at least for those who are starting out, is the fact that it is very complicated to make moves, since the movement is all done by the mouse. Registration Before you start playing Nine Dragons you need to register on the developer's website. To do this, just click here. The recording is very similar to that of the vast majority of MMORPG. So don't worry, as it won't be difficult or will take a long time. Call of Craft: Blocky Tanks Battlefield - a game on Android, where you take part in the big battles.
