Big city life simulator iphone

issuing this update to fix a number of unresolved problems and bugs that you have reported to us in recent weeks. See you again soon! It didn't take long to read I was just playing a new update and all that is absolutely amazing. And this is one of my favorite games! But every once in a while I say I would do it, or I wish it were this. And I never think to come and say it here. But what I get is that I think there should be more things with your kids. Not much, but these are your kids we're talking about. And I think that as if you don't want to just get rid of your child and they just disappear into the game (for what happens when you put them up for adoption) the game should have as much a choice as giving other parents full custody (if you not with them) or even grandparents. It may be silly and a little just put on here, but it's just small things like this that I'd like to see more improvements. For example, as you can create your own script, I think you should let us add our own scripts to our own game. And even add more scripts throughout your life. Also, with custom people, now with God mode you can design your people and stuff, you have to do it where you just design what they look like, when you create custom people they appear in your game you don't have to recreate their look every time. If you are reading this I hope you take into account my thoughts, they may be stupid, but I tried to help. And I may have lied it looks longer than I thought it would be☺ Thanks for having such a thoughtful review! We always love to hear opinions and ideas from people who play the game! Your ideas have been noted! We appreciate your support! 📧 ⚡ For the game I suggest that we can play sports professionally as well as I like what you've done with Instagram so I think we should expand this idea and create Snapchat Facebook stuff like that and shouldn't be tweaking when you hit the add button instead of the year going can be like day or week in, month, even a few months, and when you hit a month or a day u have to get to decide the number of days of the week or years that have passed also that should be the phone so we can text our classmates about homework or hit our friends to hang out and even text our crushes to ask them as well as I think they should have more jobs and instead of them all in one place we should have them in different areas, like sports, medical, political, scientific, or even mechanical I also think there should be places that u should be able to hang out with friends and go on dates with your crushes I also think that u should be able to get your ears pierced and instead of just being able to see the head of the character u should be able to see the whole body and you should also be able to buy clothes for yourself and once u buy them you can customize them to your character and there should be little you can see your character and customize him/herYTho for the whole game is a lot of fun and I can't wait to see the updates that you guys are in store for us☺ 📧📧 you are loaded with great ideas! Thank you for sharing them with us! You can just see one or more of these ideas in the game with a future update! Thanks for your support!👉 don't think this game is a bad game because I don't think it has enough, there are probably about 2000 different things that can happen to you in this game and its very addicting and immersive since you can get sucked into the hours of playing it out of boredom... Frequent updates are very nice and I appreciate the time the developers spent putting in this game and making it realistic. However, the only problem I've ever experienced is that it gets repetitive from time to time, I think there should be more options in college and ways to get into college, and there should be more job choices like social media stars, rock/pop stars (I just want to be famous), a professional athlete (hopefully indicated if applied), and whenever I study art in college, I never see any acting jobs every year, so that jobs have to change dramatically each year. I've bought \$2 bitizenship in the game and its very useful when you're impatient like me. Also, go back to university after visiting once should be applicable, and a refreshing choice a second time. And for emigration countries must be updated every 5 years. I hope I get a response from Bitlife and their excellent customer service. I've heard great things about this game and I hope it just gets better. Wow, so many great ideas! We have so many things that we plan to implement in the game and you hit on so many of them. Everyone else is us To the list! Thanks for not leaving such a thoughtful review! ⚡ developer. Candywriter, LLC, pointed out that the app's privacy can include processing data, as described below. Play City Osa Life Simulator 3D and try to help a lone insect to stay alive in a dangerous human city! Imagine that you are a yellow wasp jacket in a city full of aggressive predators and human beings. You have to protect your nest from aggressive spiders and strike back by revenging these people for your suffering! So, be careful and keep the sting alert - aggressive insects such as bees, beetles, spiders or butterflies near you. Also, you should use every opportunity to attack citizens - they deserve it, you know! Don't forget to object to the health of your wasp, energy, water and food to survive - if one of them falls - there is no chance of staying alive! Gather enough resources, earn points and upgrade your insect's skills to be more effective in this epic fight against humanity! Hire your wasp to make him the perfect killer! Explore the modern city and experience the micro-world that survived our City Wasp Life Simulator 3D! City of Wasp Life Simulator 3D Features: Help cute wasp, to survive in the big cityFeel as part of a micro world full of angry insects Use points to update your waspEnjoy realistic graphic with realistic creaturesStay alive as long as possible in this hostile human townBecome bug of a giant microcosm, run through the streets of the city and blocks to find food and water, fight other aggressive insects, stay alive and return to your colony in the city of Osa Life! Where are the birds? I only found one insect, another wasp, and all she did was fly away! There are no other bugs, or birds, or anything! Just a lot of people. Add animal bugs, then you get 5 stars. Until then, u must stick to three. The only thing you can do is sting people and eat! There are no birds or insects☺☺ There is a hive or a nest with nothing in it. Whenever I go forward. I'll show up. You can't even go INSIDE at home. I would like this game much if you could go inside the house, create a wasp nest, and evolve or turn into other species of wasps. Please make this game better and please add all the things I mentioned. I don't like this game! All you do is just fly to sting people and wait for a long time to sting another other You can't play with other people and it's hard to fly or maybe it's just me. And there's such a small village chasing you in nothing! It's just one of those games that make it look fun, but it's actually boring. So don't play this game.
