Hungry shark evolution map shells

Comments Share The Mission Map was a map showing the locations of all mission grenades. It cost 60 gems and also claimed to help you find them, but in practice it could not be recommended unless you had serious problems finding Mission Shells, or simply not buying anything in the store. Found shells were omitted from the map, so this map was useful only as a pointer and not as a log. However, it was helpful because some stronger shark shells were often very well hidden and almost impossible to find without this map. The basemap is required to unlock the mission card. Trivia There are maps on the Internet that reveal the positions of grenades, so if you use them, you will never need the mission card. Because mission grenades have been removed, it has been removed, as well as that community content is available under CC-BY-SA, unless otherwise noted. View source Comments Share Mission Shells were grenades scattered throughout the map. After a grenade is discovered, a mission is unlocked that makes it available for completion and reveals what you need to do to complete the mission. Missions are tasks assigned to all sharks in Hungry Shark Evolution. These missions give rewards to coins when locked out, with the exception of the Top Secret Lab Sharks, whose missions give gems. A super mission will be unlocked for each shark when all previous missions are completed. The super mission provides the largest reward of any mission for this shark, generally more than three times the amount. Each super mission requires you to score a certain number of points in a run. The bigger/later the shark got, the more difficult the missions were (with the exception of Sharkjira, whose missions are very simple). Missions There are a total of 117 missions assigned to non-special sharks: 104 normal missions and 13 super missions. There are 40 missions assigned to special sharks: 32 standard missions and 8 super missions. Missions are tasks of different but unspecified difficulty levels, resulting in an increasing number of coins depending on the shark assigned and the difficulty. You have to complete a mission in a game - not in total. In addition, rewards for missions for a particular shark can be different. Note that gemstones cannot be rewarded (for standard sharks). Each shark has 9 missions (except for the top Secret Lab Sharks, who have 5). Completing a mission rewards coins. When you complete 50 missions, the jet pack is unlocked for free use, and 75 unlocks the rocket launcher.
