Read more Roku announced it is expanding its free/linear lineup on The Roku Channel to more than 100 channels available in the United States. To help navigate through the sea of new content, the company also introduced a new Live TV Channel Guide aimed at creating a large catalogue ad browsing as easy as possible. The new channel, launched Tuesday, June 2 while the Live TV Channel Guide - which is essentially visible and works similar to the cable TV guides that many Comcast and Dish customers may have grown getting used to - is expected to roll in the US in the next few weeks. Roku Channels are available across all Roku and TV streaming devices with built-in Roku, as well as Samsung TV and Roku mobile apps. The 100 free content sound channels are impressive, especially for those who have recently cut ropes and may be missing the options provided by cable TV, but quality things too. The good news is that, although it's not quite premium content, Roku Channel seems to have amassed some interesting channels across different genres. For news, you can navigate between channels such as ABC News Live, NowThis, Reuters, or USA Today. Sports networks include the Fubo Sports Network, Outdoor TV, and Xumo-powered Adventure Sports Network. Channels like Redbox Free Movies stick between movies and TV options, with Kidz Bop TV and Teletubbies highlighting children-friendly channels. Roku Channel loads lifestyle enthusiasts with plenty of options too, with Bob Ross Channel, Glamour, GQ, Vanity Fair, and Vogue among the most notable options. There are several Spanish-language channels, including AFV Español and Love Nature Español. Unfortunately, mainstream channels along the ESPN or TNT lines do not play here. However, the content is free, and there are plenty of them. So, while content may not be as familiar as some would expect, you probably won't have trouble finding something to watch among the 100 plus The Roku Channel deals. Roku isn't the only name in a free live TV streaming game - far from it. Services like Crackle Pluto TV stands out, although there are legitimate enough options that we've done the job of making the best of them.
