This Instructable is for a method I use to make all my own ringtones. First of all, if you don't have the audacity go get it. Here's a link: audacity.sourceforge.net/. Now on to the real part. Open Audacity and click >Import Audio. Or you can just press Ctrl+I. When the window comes up directly it to the song you want to use. Now this step may or may not be necessary. Click the space between the buttons to mute and the track settings menu, or drag the entire track. Now click Effects>Amplify and adjust the slider until New Tip is between 0 and -1. OK ok and move on toll your track is too long, then you may want to shorten it. Play the track and select the area before the area you want to be your ringtone. It should be from the beginning of the track to where the ringtone will begin. Delete it. Repeat for the section by ringtone. The last Audacity step involved is to export the sound. Click >Export as MP3. Save it where you want and then close Audacity.The other great program used in this process is AMR to MP3 converter. If you haven't got it yet, you can get Here. Open it up and on the MP3 tab for AMR AMR someone would be ringtones. Click converter. When the little window pops up, it's done. Hit OK and shut it down. The last part is to get it to your phone. You can email it or if you have the cable you could do it that way, but for me the fastest way is to use bluetooth. phone to your computer. Then open your conversion export folder and find the ringtone you made. Right-click it and choose send to:>Bluetooth device. Pick your phone and send it off. Your phone will probably ask you for permission to receive the file. Say yes, and it will transfer in a moment. Congratulations. That's it. Enjoy your silly tunes when you get a call. There was a period when each mobile user had their own ringtone. But that is not the case today. You've probably been in this situation many times when you hear a standard mobile ringtone in public and think it's your phone ringing. Changing the ringtone is not just a way to customize your phone. You can also use it to differentiate your contacts by setting different tunes for different people or groups of people. It can help separate your personal life from work without other people realizing it. The good news is that there are plenty of options out there.
