You've come to the right place. Rootless Pixel Launcher is a launcher ported from Google's Pixel Phone, it brings to users the original features of an Android Oreo Stock Launcher You can install and use it as a regular launcher. Of course, it can be installed without root, which is good for those who want to experience the original Launcher on Android. The latest version is 3.6. In this version, the developer has fixed and added some features to work more stably. It is also compatible with notches and can use the same tools to change the Substratum theme. A separate theme area also appears in the launcher's setting, which includes 5 bearing themes: Automatic (change background color)Default (this theme color is light)Dark (theme for the night that helps you not know the unnecessary light light (the theme is brighter than the standard)Transparent (based on a dark theme but makes the app tray invisible to see the background). Rootless Pixel Launcher is the best Oreo Stock Launcher on Androidpixel rootless launcher apkNormally, we recommend that you should choose Standard because it has the correct brightness, wallpaper and icons suitable for most people. In the setting, there are some other customizations you can explore. can also change the default start program icons to another favorite package. Previously, we introduced nova Launcher Premium – a great launcher for those who want to replace the stock launcher. But if you want to experience the original features of the latest Android Oreo, rootless Pixel Launcher will satisfy you. Rootless Pixel Launcher Key Features: The original Launcher is ported from the official Google Rom.Many options themes were changed with Dot Notification support. Allows modification of the default icon packSimple interface, smooth operation and stabilitySupport Substratum and OEM themingAnd many other featuresRootless Pixel Launcher can run smoothly on most Android devices, we provide apk link of this application just below, with which you can choose one of 2 links to download and install easily. This app has two versions for devices: one for Android Normal and one for Nokia Go. Most people will install the first version ... Version for Android Go should only be downloaded to devices using this Android version, such as Nokia 1. Rootless Pixel Launcher is very light, just 4M, so it's optimized for a launcher on your phone. Rootless Pixel Launcher APK for AndroidHow to download and install? Well, I think you might want to install Rootless Pixel Launcher APK right now. If you regularly search and install apps via the APK file, you can easily bring this app to your Android device. If you are a beginner, do not worry, here are some detailed instructions to help you install Rootless Pixel Launcher easily.#1: First, make sure that you have enabled the ability to install applications from unknown sources. This is in the Setting-> Security section. Enable Install from unknown sources #2: If you have installed Rootless Pixel Launcher before, please uninstall it.#3: Now click on the link we gave below to download the Rootless Pixel Launcher APK file. If you're using a PC, connect it to your Android device to transfer the downloaded file.#4: Go to the directory where you saved the file, tap it to start installing the application. Wait a few seconds for the installation to complete.#5: That's it, you've installed Rootless Pixel Launcher, don't forget to set it by default and start exploring the unique features of Oreo Stock Launcher.Final WordAfter installing Rootless Launch Pixeler APK, just enable it in Setting to search. The default device starter unit changes. I've tried Rootless Pixel Launcher on some of the latest Android devices and even older, it's still very smooth, fast, minimalist, especially Rootless Pixel Launcher also supports Dot Notification. If you are an original Android fanatic and prefer simplicity, rootless Pixel Launcher is the best choice for you. 📱 to make it easier to access your apps phone just the way you like it provides the best gaming experience A keyboard that teaches with you A powerful and elegant launcher Typing on the touch device has just become easier Customize Samsung from head to toe A new smartphone background every day If you've used more than one but other smart device, you must have known that each device comes with its own app management on the screen. Sometimes they can be the same, but quite often you will find them different. But just because it comes with such leadership to begin with, it doesn't mean there's nothing you can do about it. For something new, try using Rootless Launcher's latest APK 3.9 (30907). Rootless Launcher File Information Last updated: October 22, 2018 Developer: Amir Zaidi Version: 3.9 (30907) Requirements: Android 5.0 and up File Size: 1.6 MB Uploaded: October 22, 2018 at 9:34AM GMT +07 MD5: a98 409ef4ebd81acbd217a82c3e5a065 SHA1: c48fb0aa435e44479b9660197126ed5ab4917945 Available on Google Play: Install from Google Play Rootless Launcher app review There is no app without feature, Isn't that right? It can tell you how good the app is for you. There is no need to worry. The launcher has been well publicized for the benefit of all its users. From that you can expect different features. There is the search box located at the bottom, background-based theme, common icon packs, adaptive icon packs, and icon shape selection. Please note that the latest is specifically intended for Android 8.0. Nevertheless, these features are enough to give you new experience when using your device. Looking at the features, Rootless Launcher for Android seems to be quite quality one. However, you don't have to worry, fearing it will cost you money to get to use it to the fullest. This program is nothing like that. Why, of course, it's because you can use it for free. Not to mention, the features are completely open source as well. Any phone running Android 5.0 and higher will be able to make good use of this app here. Use your chance well and you will make Android a more entertaining device to see and operate yourself. ChangeLog Remove rootless Pixel Bridge installation code. Replace icon with material design version. View the starting shortcut in other launchers and Play Store. Enter tablets supported in the manifest. Manifest.
