Boss Season 5 is by far the hardest part of the game, and Requires some serious dodging skills, especially during the final stage. I very strongly suggest having your health and primary weapon both updated to Level 4 on The Beast plane before you attempt this boss. It's definitely doable without but it's very challenging even with. You go through a number of phases with the boss, alternating between shooting 4 your guns and the front of the plane. First off, pull out one of his guns, then head to the far left center of the screen to shoot down the front of the enemy plane. While there, you will have a small space where to dodge bullets and oncoming missiles. I suggest moving a little closer to the boss, so the missiles will get closer to you sooner and then you can go back to firing at them more easily. After you've done enough damage, he'll enter the next step once again, pushing a gun through him, pointing out that he'll go to the top left of the screen and circle around you (use this time simply Dodge). After winning the second gun, he will say watch out for his six, pointing to the back of your head. Make sure you are not on the far left side of the screen when this happens, as he will run you, causing immediate death. When the boss starts moving to the right of the left side of the screen, note that there will be a repair drop coming from the right. I suggest avoiding it if you can, as long as you made your way to the left side of the screen. He will start shooting full-screen volleys at you, with small holes that you can dodge through. Try to use these three times, then make your way to the left side of the screen. You can damage the boss during this stage, though it's not 100% clear if doing so actually helps in the long run, so focus more on getting any damage, as you won't be getting any more supply drops for the rest of the fight. After that step, take another gun, and the game will get you to fly out. Instead, I suggest that you head down the right side of the screen. He will start shooting full-screen Foleys again, but his right area is a safe spot. You still need dodged explosive bullets that come from the 360-degree turd behind the plane. Look to open up at the bullets and when they happen their way through they are left to the left of the screen to do some damage to the front of the boss. It took a number of runs to get enough damage on to move him from this stage. The last step is by far the hardest. I was able to reach the final stage regardless of any damage (I almost did this in the video below) but I found it impossible to hit at all at the last stage (I'm sure it might technically but will be very difficult). After you get the last gun, the boss starts firing a huge burst of green that will explode into the many bullets that fly in all directions. Basically, you want to be away from them. Blast as much as possible so you can push through a hole in them. It's very difficult to get hurt while also dodging this bullet so I suggest playing it safe and damaging him only when you find an opportunistic moment. Do enough damage to the boss's front and he will explode in typical fashion, rewarding you with 1,000+ medals (OK!). Check out the video below to see how to beat Season 5 Boss: Boss:
