Firing range simulator app

For a shooting app, that's fine. The follow-up is a bit off, and I don't like how the move stops completely when you stop touching the screen, not as realistic as it could be. This app is only available in the iPhone and iPad App Store. Ready for a real filming experience? Download shooting field simulator now! I really like to play this, but it won't record my first shot no matter which weapon you choose! This is critical when playing time limit levels, when you only have 4-5 seconds to I thought this was a game you can compete with other players. You can't find the option for that, or it doesn't work. Thank you very much for your time! It could improve tho with more realistic ranges and breathing patterns. They should also add weapon customization, such as different scopes and views, NOT SKINS! I feel the ranges are not totally accurate. There should also be some modes with moving targets and skeet shooting. Usually an awesome game, but remember to keep it realistic. Nikolai For some reason my first shot is not recorded and I call them all. The trigger does not shoot all the time causing DQ to expire. It also causes bad shots when shot next time. Frustrating when you keep realigning your view image and repeatedly touching the trigger and nothing especially with moving destination events. You don't care what you do the proper breathing control, trigger squeezing the ect. But with some of the weapons they move much more than usual.
