Pax #! WhatsApp Telegram Reddit Pinterest Twitter Facebook If you're a fan of board video games, especially werewolf, you should undoubtedly not miss among us, Inrslth's new and thrilling game. You can download the Mod APK version of this game through the link below. About UsAmong Beach Introduction America is a particularly engaging multiplayer action role-playing game. Inspired by the favored boardgame game Werewolf, the game is the main theme revolving around teamwork, beliefs and skepticism of a group of astronauts in space. Find the option to launch a ship there for a group of astronauts to leave space | However, some killers have infiltrated the crew with the intention of destroying all. Is this the fate of astronauts? In the U.S. background, the plotters are in space in a spacecraft, where astronauts within the ship must attempt to find a solution to launch the ship to leave space. However, among many crew there are imperants infiltrating the ship to sabotage the ship. They can destroy the ship, cause chaos and division, even kill people. Therefore, the astronauts aim to seek anonymous impostors to depart before destroying the ship. GameplaySurely you know a lot about the game Werewolf, so don't want to say too much in the US gameplay. And even for newcomers, the rules aren't too difficult. Because to win, understanding the law is just part, it is important that there should be reason soon, put your faith in the right place, even deceive people if you are a murderer. We need flexibility and player iq, not too much on skill. Also, with video games like Werewolf, if a group of mates have to play, it can be very attractive. You can have hours of enjoyable and learn extra about each other. Characterstarting to play, you are randomly assigned to play your part in one of two camps. On both sides, if you want to win, you have to do well with your goal and mission. For the astronaut group, win by completing missions to launch ships or chase all imposters. However, it was not easy to find the imposter immediately. Because it is not easy for them to reveal their identity anytime soon. Only when vandalism and killings happen will astronauts get clues about the creeps. If vandals occur, they can repair the damage or report it when a corpse is found. Astronauts can hold emergency meetings to discuss suspicious behavior and voting to get rid of suspects. Remember that the ultimate goal is to eliminate imposters and launch spacecraft. As for imposters, please do everything to destroy all astronauts. In doing so, it is necessary to deceive people first by working and pretending to be chatting like real astronauts in discussions. They could then create vandalism to cause chaos and divide the crew. Find the vent or sneak into the room to kill crewmembers in silence. It's quite difficult for Impostors because they have fewer numbers, but if you make divisions and kill the key figures of the astronaut clique, winning will be easier for you. Some other features can be said that the game style of boardgame games is often very interesting, especially when there are many players. With our middle, depending on the number of players, you can choose to add an imposter, add quest, ... To make the game more interesting. However, the best features are still playing with friends.
