Projecty rts apk

•ProjectY RTS 3d -full- apk! Все без регистрации и отправки смс! С высокой скоростью и без вирусов! Download ProjectY RTS 3d -full version- APK For Android, APK file named com.luminencelabs.ProjectY.gf and APP Developer Company is LuminenceLabs . The latest Android APK Vesion ProjectY RTS 3d -full version- It's ProjectY RTS 3d -full version- 1.0.71.gf You can download free APK Then install On Android Phone.ProjectY RTS 3d -full version- APK DescriptionThere is a nice startup tutorial made by Janno. Important information: If you find bugs or if you want to suggest changes, improvements or whatever you are invited to join the forum! This will help make the game more fun! This is the full version of ProjectY that includes everything (all maps, campaign, individual and multiplayer, etc.) for a fixed price, not in the purchase of the app, without payment and without ads. ProjectY is a real-time strategy game with focus on the tacts unit and not the construction of the base. The objective of the game is to capture the sector with the enemy headquarters. By capturing sectors, the player gains influence in the factories that produce units. All maps can be played as single player or split-screen multiplayer (very nice on tablets) or network multiplayer (LAN or Internet). The full version contains the tutorial, the full singleplayre campaign and all maps can be played in one and all multiplayer game modes. No more in app purchases are necessary, everything is included! Please send bug reports if the game crashes! About the necessary permissions: - full network access and view network connections: Required by network multiplayer mode and map downloads - modify or delete the content of your USB storage and test access to protected storage: Necessary for savegames, options, downloadable content - read accounts: Needed to read the name of your account that is used as your unique identifier (encrypted) to store your profile (score, Games played, achievements, ...) - vibrate: Necessary for vibration notification when a player joins a server while the app is in the background (so you don't have to wait in-game for other players) - access to wifi status and change wifi multicast status for discovery of multiplayer LAN server cloud_download Download APK App Description ProjectY RTS 3d -version full version-LuminenceLabsStrategy Package Name com.luminencelabs.ProjectY.gf Updated File Size Undefined Requires Android Android Android Version Developer Installs - Price Free Category Developer Google Play Link Google Link DescriptionProjectY RTS 3d - fascinating strategy in which you need to take advantage of your enemy's territory with all the plants that make military SystemA lot of unitsAfling by space weaponManosmanjesGame in the InternetRatingDownloadYY Project is a real-time strategy game with focus on the tacts unit and not the construction of the base. The objective of the game is to capture the sector with the enemy headquarters. By capturing sectors, the player gains influence in the factories that produce units. All maps can be played as single player or split-screen multiplayer (very nice on tablets) or network multiplayer (LAN or Internet). There is a nice getting started tutorial made by Janno: information: If you find bugs or if you want to suggest changes, improvements or whatever you are invited to join the forum on the website! This will help make the game more fun! This is the free lite version of ProjectY. It has a limited number of maps and no single player campaign. The free Lite version contains the tutorial and some free single multiplayer maps. To get the campaign and additional maps, get the full version here: send bug reports if the game crashes! About the necessary permissions: - Full network access and view network connections: Required by network multiplayer mode, map downloads- modify or delete the content of your USB storage and test access to protected storage: Necessary to save games, options, downloadable content- read accounts: Necessary to read the name of your account that is used as your unique identifier (encrypted) to store your profile (score, games, Achievements played, achievements, ...) - vibrate: Necessary for vibration notification when a player joins a server while the app is in the background (so you don't have to wait in-game for other players)- wifi status access and change wifi multicast status for multiplayer LAN server detection
