The band BTS performs 'Idol' | Andrew Lipovsky/NBC/NBCU Photo Bank via Getty Images BTS is a South Korean K-pop group With two films, millions of plays on their YouTube music videos, and multiple award nominations, BTS solidified themselves as one of the biggest boys bands in the world. Some are left wondering how a South Korean K-pop group can reach so many fans around the world. Its success, according to some members, is partly due to the universal language of music. However, the K-pop group has some help reaching out to their fans; some of the members speak several different languages. Each BTS member speaks a bit of English, and sometimes the guys even lied in English. K-pop band 'BTS' Photo by RB / Bauer-Griffin / GC Images Do BTS members speak English? After spending so much time abroad, each BTS member collected English words and phrases, which they often say during interviews and live performances. Although MRI is the only member that is technically fluent in English, some other members are bilingual or even trilingual, including V, who speaks fluent Japanese. V also happens to be proficient in English with his recently released solo song, Winter Bear. In this single, the artist sings the song entirely in English. If you've seen any BTS interviews in America or England, chances are you've seen MRI show your English. The group leader originally learned the language by watching the 1990s sitcom, Friends. Since then, he has acted as a translator and spokesperson for BTS while abroad. Also, according to some Quora fans, RM speaks Japanese very well. According popbuzz.com, J-Hope and Jin are quite fluent in Chinese, in addition to J-Hope's Japanese and English skills. During interviews, the group says the member who spends the most time learning English is probably Jungkook, and it definitely shows. Even as she sings, each member demonstrates their competence in the language. BTS sometimes sings in English and even features American artists, such as Halsey V's solo song Winter Bear, would not be the first time BTS sang in English, as many songs popularized by the K-Pop group include English words or phrases. In addition, most of his song titles are written in English. The group even broadens its appeal by releasing translated songs in Japanese. Apart from singing some English words or phrases, the group branched out on their own to sing in different languages. BTS' RM was presented Remix of Lil Nas X of Old Town Road. During an interview with Time Magazine, the group explained why they don't want to switch to songs performed in English. We don't want to change our identity or our genuineness to get number one, RM said during the interview. Like if we're going to smoke suddenly in full English, and change all these other things, then that's not BTS. We'll do everything, we'll try. But if we couldn't get number one or number five, that's fine. BTS music, including their recently released album, Map of the Soul: Persona, is available on Spotify, Apple Music, and most major streaming platforms. On Friday, BTS released a new music video for the feel-good song, Dynamite. In no surprise to one of the most popular boys' groups in history, BTS broke the YouTube record for the most watched video in the first 24 hours of release with over 101 million views. But what really made headlines was that Dynamite is the band's first song with totally English lyrics. This decision may have been a surprise to many fans. So far, BTS has written, produced and performed most of its songs in Korean. And while there are exceptions - band member RM collaborated with musician Lil Nas X for the Seoul Town Road Remix and bts' latest album release in Japan also featured a number of Songs in Japanese - for the most part, the group is known for its Korean lyrics. So what does the English single mean for bts? Dynamite' may seem new, but it doesn't reverse the identity that belongs to BTS as a member of artistsBTS Jin told reporters at a virtual press conference before the music video release that recording a song in English was a new challenge to showcase a new BTS side to our fans. Not only are lyrics entirely in English, but the style and genre of music are also closer to pop music, according to Gyu Tag Lee, assistant professor of cultural studies at George Mason University in Korea. As a result, Dynamite's new lyrics, genre and style may initially surprise viewers who tuned in to K-pop. K-pop is a very unique and different genre. There are very specific K-pop qualities that fans expect when tuning in to the genre, Lee explained. Naturally, when the music is slightly different from what they expect – it generates conversation. Kevin Winter/Getty Images But at the end of the day, Lee said the upbeat new single doesn't shy too far from its roots in K-pop. Everything from the visual aesthetics of music video to style and presentation of members is still very BTS. BTS has crafted an identity for themselves as one of the most representative K-pop groups, and I don't think that has changed, he said Yes, it's a new attempt, but it doesn't reverse the identity they've made for themselves as artists. Just because BTS releases a new single in English doesn't mean Fundamental identity - the fact that they are Korean - has changed, Korean culture and k-pop journalist Hee A Park agreed. They are still k-pop artists. The new single is a gift for overseas fansThe band member J-Hope told reporters on Friday that Dynamite was a last-minute decision that was not originally in BTS's plans. We wanted to be on stage and as a group you have to communicate with fans, we felt empty and powerless, said BTS member Jimin. We needed a breakthrough to overcome this void and helplessness and we found this new opportunity. Experts say Dynamite signals to overseas fans that BTS is prioritizing its global audiences even if they can't meet them in person right now. Because of the pandemic, BTS cannot hold concerts or tours around the world, Lee said. The lyrics become even more important when fans are accessing the songs through streaming services versus a live performance with crowds and loud music. When seen through this lens, singing the lyrics in English is like a gift and a care expression for fans in English-speaking countries, according to Korean music critic Youngdae Kim. These fans have, so far, done their best to analyze and consume BTS content by resisting language barriers, Kim said. He added that there will be a different sense of familiarity and affinity than one experiences when they hear the song in their native language. Park also noted that details of the music video, such as the various posters of world-famous artists hanging in Jungkook's room, included references that could also appeal to fans around the world. Balancing 'Bangtan Sonyeondan' with 'BTS' At a virtual press conference on Friday before the new music video release, BTS members explained in their own words why they decided to smoke completely in English. RM said the group decided they wanted to keep it in English and preserve the charm they first felt when the song was presented as an opportunity. When we were recording the guide version, we thought the English lyrics fit the melody a little better, added band member V. Considering the song and melody, we all agreed that singing in English would be better, said V at the virtual press conference before the Dynamite music video release. Big Hit Entertainment Based on what BTS members have said, it's hard to tell if Dynamite points out more opportunities in the future for fans to listen to the group that would sing in more languages in addition to Korean. Ultimately, it seems that Dynamite's English lyrics - like the release of the song itself - are best interpreted as a fun surprise for BTS fans. But if Dynamite a progression towards making music in languages beyond Korean, BTS is in charge of a balancing act. The group strongly embraces their identity, as Korean artists and many Korean fans are more familiar relatives the group under the name Bangtan Sonyeondan (or Bangtan Boys) instead of its international nickname BTS. One remaining task for BTS is to help fans who are struggling with both 'BTS' and 'Bangtan Sonyeondan' identities to understand that 'Bangtan Sonyeondan' is 'BTS' and 'BTS' is 'Bangtan Sonyeondan', Park insider said. In a way, Dynamite is already a step forward in balancing these dual identities and the public. While the lyrics may be in English, Dynamite fits into the Newtro (a combination of retro and new trend) that is currently popular in Korea, according to The Korea Times. This song - even if it's in English - will work for audiences in Korea, Kim said. The interviews were conducted in Korean and translated into English by the author. Each student has different objectives and, therefore, different approaches to learning English. But some tips and tools are likely to help most English learners. Let's start with the three most important rules: The most important rule to remember is that learning English is a process. It takes time, and it takes a lot of patience! If you have patience, you will improve your English. The most important thing is to create a plan and follow this plan. Start with your English learning goals, then make a specific plan to succeed. Patience is key to improving your English, so go slowly and focus on your goals. You will speak English very soon if you stay on the plan. It is absolutely necessary for learning English to become a habit. In other words, you have to work on your English every day. It is not necessary to study grammar every day. However, you should listen, see, read or speak English every day – even if it is for a short period of time. It is much better to learn 20 minutes a day than study for two hours twice a week. You care: remember that learning a language is a gradual process— it doesn't happen overnight. Define your learning goals early: What do you want to learn and why? Make learning a habit: try to learn something every day. It is much better to study (or read, or listen to news in English, etc.) 10 minutes each day than to study for 2 hours once a week. Choose your materials well: you will need to read, grammar, write, talk and listen to materials. Vary your learning routine: It is best to do different things every day to help maintain the different relationships between each active area. In other words, don't just study grammar. Finding friends: Finding friends to study and speak invaluable English and learning together can be very encouraging. Keep it interesting: Choose the listening and reading materials that relate to what you're interested in. Being interested in the subject will make learning more

enjoyable, more effective. Relate grammar to practical use: Grammar by itself doesn't help you use language. You have to practice what you are actively learning it. Use reading to help with other English skills: Reading can be used to help with vocabulary, grammar, pronunciation and more. Flexing the muscles of the mouth: Understanding something does not mean that the muscles of the mouth can produce the sounds. Practice talking about what you're learning out loud. It may seem strange, but it's very effective. Exercises like tongue twisters can help improve your flexibility.Communicate: Grammar exercises are great, but having your friend on the other side of the world understand your email is fantastic! Use the Internet: The Internet is the most exciting and unlimited English resource anyone could imagine and is within your reach. Scope.
