Understanding the need for an armed force to protect the interests of the population has been an integral part of nations for thousands of years not only for those they want to conquer, but also for those who just want to defend. You can't count on the kindness of your neighbors, unfortunately. But the army is more than just fighting wars. Our armed forces have proved valuable as peacekeepers and, in times of turbulence when a disaster occurs, the military can step up to restore order. Order, organization and discipline are fundamental to a functional army and to this end, the rank system has proven to be a great way to organize soldiers and recognize standouts by giving them responsibilities and duties that reflect their unique abilities and abilities. Those who can rise in rank and offer everything possible to help the military as a whole become a better and more efficient unit. It's a good system, and it works. But from the bottom of that scale, it can be daunting. How far will you get up? If you help us right now to answer some questions to design your army, maybe we'll find out. Take the quiz and see! Copyright © 2020 InfoSpace Holdings, LLC. a corporate image system1: Shutterstock The Army Ranger and Navy SEAL are two of the most iconic figures in our military culture. They're both special forces from different parts of the U.S. army. The army itself has four branches: the army, the navy, the air force, and the Marines. Each of them has the task of defending the homeland and conducting operations to ensure global security. Not everything they do is about war either: they provide a huge amount of humanitarian aid and, when there are terrorists to fight, they are often sent. They also ensure the world's high seas and major trade routes against piracy. The world is much more dangerous for some people because of them, it is true - and many of these people are unfortunately innocent civilians - but it is also much safer for many, including not only the Americans but also our allies and even some of our enemies. Even by current standards (i.e. civil war), it would indeed be a particularly miserable day in Yemen, for example, if the Gulf of Aden or the Red Sea were oversized by pirates! Each military branch has its own special elite units to match its particular required skill set. If you tell us about your skills and preferences, we'll see which of these two elite fighting forces you should join – or whether you should stay home!
