This app is only available in the app store for iPhone and iPad. Rise through the ranks against 24 of PBA's best bowlers as you compete for a variety of regional and national championship trophies. Starting in a local alley with a 5kg valve ball, you can hone your skills against bowling legends on the way to competing in the Tournament of Champions! Start a career or bowl a fast game! Career mode is at the heart of the PBA bowling challenge, but if you'd rather just lace up and take to the paths, we've got you covered. Choose from a wide range of rivals and locations and open up even more content in career mode! Multiplayer online action! Bowl against your friends in real time, one-on-one multiplayer games! Powered by Game Center services, Multiplayer Mode allows you to invite your friends or get compatible against a random opponent! Bowl against the best! How do you think you're going to fare against the cool, precision confidence of Walter Ray Williams Jr. or Pete Webber's glans of power? How are your scores going to stand up to Norm Duke's high rotation and smooth release or Tommy Jones' high back swing? Based on actual stats to track their strength, hook, and control, the PBA Bowling Challenge aims to accurately recreate the skill and style of the sport's leading bowlers today. Features include:- Quickplay, Multiplayer, Career Modes!- Dozens of PBA tournaments!- Bowl against 24 of the best PBA bowlers!- Over 100 different bowling balls with unique statistics!- Leaderboards and achievements.- Bonus challenges in every tournament!- Split balls, bomb balls, and more! December 12, 2020 version 3.8.26 we made some bug fixes to enhance your gaming experience. I've been playing this app relentlessly since 2014. I play every day every time on an iPad since I have all the power bowling balls so running out of energy is never a problem. When I started playing the game there was a bit of an annoying need to wait to load but over time saved to get energy charging balls which cancelled the wait. When enough extras were watched to save for the ultimate ball and then never had to wait again. Never bought gold pins was just to watch ads and win to earn, loving the venues that were added when they appear. Love the special balls, daily spins, weekend events, and other challenges. Only problems are sometimes locked in after a game and need to be restarted. This occurs at certain times of the year while other times never lock and work flawlessly for weeks. Sometimes the sound disappears and a need to reboot to return. Sometimes to get spins the videos don't play and get activation errors. They all look minor compared to the overall experience of the game. Technical support was ok when needed once in early 2018 the game lost all my settings (special balls, points, gold pins etc...) and I had a lot of gold pin points and special balls that were all And I was really bummed. Send an email for support which sent me a special file to recover my statistics and recovered successfully. Thank God otherwise I would have stopped playing a game altogether. Hope this game last many more years as endless entertainment and hello, we are glad to hear you enjoy the game so much! If you're having problems like the ones you described, don't help contact us and we'll be happy to help do everything we can for you. You can reach support@concretesoftware.com or by using the game's Inbox contact button. Thank you, the concrete software game has been fine for months but then as of last Friday the game didn't open at all. Finally a few days later when it hasn't opened yet, I deleted the app and re-downloaded it. Well, it starts fine now but I literally lost everything. I put money in and a lot of time to open almost every ball and every level. There's tons of gold pins. I even logged in through Facebook and somehow he can't remember my profile and won't recover purchases. Stay away from this game! I tried to contact the game developer twice and heard nothing at all. Very disappointed *** update **** they fixed the problem and most of it all came back to me. Except for a few bowling balls I've purchased before. Not too worried about it. Mostly recovered everything so gave 5 stars hello,we are currently working through support from the weekend, but we are working to respond to everyone. I apologize for the delay. Thank you, concrete software has been playing every day for the last six months. You need to keep your spin streak alive or else need pony up points to revive it. It's no big deal. A big problem I see is like moving up the levels, the cost of playing is growing so. So if you have 400 energy points shows it costs 250 points to play. If you have 1000 points if it cost 800 points to play. So you can never play two games in a row without using pins to buy more energy. And I would never use real money to buy energy points. There are also times when the game is slow and unresponsive. Not sure if it's my iPad, but many times the game will freeze during a roll and before you know it the ball rolls not how you threw it. I've had a lot of perfect games ruined by this lockdown. You get into a rhythm about how you throw the ball and this annoying setback breaks it. On the plus side when the game works like it should be fun to play. A lot, almost too many ball selections (obviously very expensive to get the balls better). But controls are nice. Oil patterns affect ball play when you move through tourneys. Some special events require you to be at an insanely high level and even be able to launch. I play every day for six months and at level 33. Some balls and events require you to be at levels 75 up. Of course you can play real money to move faster, but you know what? Say about a fool and his money. Hello, thanks for your feedback on the game! If you have any other questions or comments please let us know support@concretesoftware.com. The developer, Concrete Software, Inc., noted that the app's privacy practices may include handling the data as described below. For more information, see the developer's privacy policy.
