Canon image runner 2520 Network Settings Please follow the setup procedure described here to connect the Canon imageRUNNER 2520 to a TCP/IP network. Network cable connection. Connect the machine to the network using a network cable. Interface settings (Interface settings (Ethernet driver)) Define the interface settings for communication between the machine and the computers on your network. To define settings, use: Engine Control Panel Remote UI (via Web Browser) Communication Environment Setting (Communication Environment Setting) Set a configuration for communication between the machine and the computers on your network. To define settings, use: Engine control panel Remote UI (via web browser) IEEE802.1X Authentication Settings (IEEE802.1X Authentication Settings) If access to your network requires authentication to a RADIUS server, set the authentication setting IEEE802.1X. IP address setting (Assign machine IP address) Enter the Canon IRA 2520 network address and establish a connection to a computer on the network. Any of the following can be used to define settings: Motor Control Panel (Additional Features menu) Remote UI (via browser) Click here to get more support. Canon imageRunner 2520 Network Printer Setup Canon imageRUNNER 2520 Driver Download Drivers and Windows 32bit Canon imageRUNNER 2520 Generic FAX Driver for Windows 32bit Canon imageRUNNER imageRUNNER PPD File for Windows 32bit Canon imageRUNNER 2520 Generic Plus PCL6 Printer Driver for Windows 32bit Canon imageRUNNER 2520 Generic Plus PS3 Printer Driver for Windows 32bit Canon IR 2520 UFR II LT Driver for Windows 32bit Canon imageRUNNER 2520 MFDivers (2520 MFDivers Driver for 2 520 UFR II/ ScanGear) for Windows 32bit Canon imageRUNNER 2520 Color Network ScanGear for Windows 32bit Canon imageRUNNER 2520 PostScript 3 printer driver for Windows 32bit CanonRUNNER image 2520 PCL5e/5c printer drivers for Windows 32bit Download drivers and software Windows 64bit Canon imageRUNNER 2520 Generic FAX Driver for Windows 64bit Canon imageRUNNER 2520 PPD File for Windows 64bit Canon imageRUNNER 2520 Generic Plus PCL6 printer driver for Windows 64bit Canon imageRUNNER 2520 Generic Plus PS3 printer driver for Windows 64bit Canon image DRIVER for 2520 UFR II printer for Windows 64bit Canon imageRUNNER 2520 UFR II LT printer driver for Windows 64bit Canon imageRUNNER 2520 Color Network ScanGear for Windows 64bit Canon imageRUNNER 2520 PostScript 3 printer driver for Windows 64bit Canon imageRUNNER 2520 PCL5e/5c printer drivers for Windows 64bit Canon imageRUNNER 2520 Drivers and Software MacOS X 32bit/ 64bit IR 2520 Fax Drivers Utilities for Macintosh PS Printer Driver/Macintosh Canon IR 2520 UFR II Driver Macintosh CanonRUNNER image 2520 PPD for Macintosh Canon imageRUNNER 2520 UFR II for Macintosh Canon IR 2520 Scan Driver & Utilities for Macintosh drivers and software Linux 32bit/ 64bit Canon IR 2520 UFR II/UFR II LT Printer Driver for Linux Canon imageRUNNER 2520 Manuals Download Canon imageRUNNER 2520 User Manual HTML Canon imageRUNNER 2520 List of configuration profiles (pdf) Canon IR 2520 UFR II LT Installation Guide Windows (pdf) Canon IR 2520 UFR II LT User's Guide Windows (pdf) Canon IR 2520 UFR II Macintosh User Guide (pdf) Canon IR 2520 Fax Drivers User Guide for Mac (pdf) Canon IR 2520 UFR II/UFR II LT Printer Driver User Guide for Linux (pdf) The everyday requests for fast high contrast printing are met with the Canon IR-2520 Image Runner Printer's steps of up to 20 ppm and deeply responsive recovery from sleep mode. Joined with up to 2,000 sheet paper limits and an instinctive touch-screen show, this Multifunctional printer (MFP) is ideal for busy, little and medium working groups with high printing duplicate volumes. The Canon IR-2520 Printer cuts your paper utilization considerably with a standard dual-sided printing mode, which allows easy printing or duplication on the two sides of the paper, without finding quality. Your business can reduce paper by up to half – saving assets and the climate at the same time. Progressed Productivity The day-to-day requests for fast very contrasting printing are received at speeds 20 ppm and exceptionally responsive recovery from sleep mode. Joined by up to 2,000 Sheet Paper Limit, These Multifunctional PrinterPrinters are ideal for busy, small and medium-sized working groups with high printing duplicate volumes. With discretionary shading send clients can quickly and effectively investigate shading directly to an assortment of objections. Cost Control Similarity to Canon's uniFLOW programming provides more notable straightforward spending, allowing you to follow just as fee explicit print trades to people, divisions, areas and businesses. Similar to Canon's e-Maintenance, additionally, can improve uptime through far away diagnostics, mechanized meter readings, and consumablecontrol to reduce management time. What's more, with click load, you're just compensation for what you print giving you more remarkable control of spending. Security An underlying security includes means prints are held until the significant client recognizes itself, using a PIN number. In addition, when printed, they are of course erased for waterproof archive control. Organizational integration This model can be effectively associated with your IT organization, just as incorporated into your current IT framework with PCL and discretionary PostScript maintain. Print, duplicate, filter, discretionary send and fax Speed: Up to 20 ppm Up to 2,000 sheets of largest paper limit Instinctive touch-screen view Wide design choices Organization prepared, PCL and discretionary PS maintain Energy efficient uniFLOW and e-Maintenance similarity Follow the procedure described below to set the machine to use its functions. IMPORTANT It is recommended that your network administrator perform the following procedures. Use the machine control panel if you are setting up the protocol settings for the first time. After you configure the protocol settings, you can change the content by using the Remote Interface. Follow the setup procedure described here to connect the machine to a TCP/IP network. Network cable connection (See Chapter 2, Before you start using the machine, in the user's manual.) Connect the machine to the network using network cables. Set the interface settings for communication between the machine and the computers on the network. To set the settings, use: Remote Interface Control Panel (via a web browser) Communication Environment Settings (Communication Environment Settings) Set a configuration for communication between the machine and the computers on your network. To set the settings, use: Remote Interface Control Panel (via a Web Browser) IEEE802.1X Authentication Settings (IEEE802.1X Authentication Settings) If access to your network requires authentication to a RADIUS server, set the settings for authentication of IEEE802.1X. Enter the network address of the machine and establish a connection to a computer on the network. One of the following can be used to set the settings: The machine's Function menu) The remote limit interface (via a web browser) Follow the setup procedure described here to set the machine for printing and sending faxes from a computer. IMPORTANT Sending faxes from a computer is only available when the optional Super G3 Fax Board-AG1 is attached to the machine. If you are printing from a computer over a TCP/IP network, you can use the following program protocols: LPD Raw (Windows 2000/XP/Vista/7/Server 2003/Server 2008 only) WSD (Windows Vista/7/Server 2008 only) Follow the setup procedure described here to set the machine to use the e-mail and I fax features. IMPORTANT To send e-mail or I-fax, the Send feature must be enabled with the optional Color Send Kit-Y1. Note For details of system requirements, see Using E-Mail/I-Fax. Follow the setup procedure described here to set up the machine to send data to a file server (FTP or a shared folder). IMPORTANT To send data to a file server, the Send feature must be enabled with the optional Color Send Kit-Y1. Sats-Y1.
