I have a table for 2.2.0-15666 and found this pattern to increase the ranking of general, agent and army without fighting or waiting for the next before.
Well the process is as follows for General /Agent 1)Select a unit in game 2)Go to xp trandition points 3)Right click and open this memory area browser of this address 4)Select the ninth value the fifth value from left to right of this address 5)Put 09 roughly it in each and choose the character again and its rating will be ten ahah what cheating?

Have you used a cheat engine on the war that includes Rome ???
You choose the general in the game to go to his reef and then go to engine cheat and open the details or tab characters for this section of the Mahaaz table what is cheating?

Not sure what I'm doing wrong but I can't edit generals. It doesn't show anything just question marks.

Post by CPJMMXIII » Sunday May 21, 2017 13:11 Hi, I am running a total war 2 mac emperor edition using steam. There's a 6.2 cheat engine. None of the above scripts can be run for RTW2. It means build v0.0.0 16157.736913 in the upper-left corner of my game menu screen. Did you ever wonder if you could help me get a desk for work?

I can run the script first but when I try to run the second it doesn't check the box to run. Can you please help me? I also torrented it, EE v2.0.0 and have the same version table. Not sure if it should be bought using steam or not.

Yes, So, sorry if it counts as a necro, but Reci, the one you have declared is for b13903 v2.0.0 is not for this version. You uploaded the wrong file. Please post the right one. Or should I PM it instead, guys?
