It was developed by Yakuto, the British studio. The game has not been released for all the smartphone users simultaneously. It was firstly released for the IOS users only, in May 2014. However, on March 11, 2015, the game was introduced in the play store for Android users as well. It is one of the most advanced sports games ever presented for both Android as well as IOS users. The game is played using very simple jesses; Gestures used to use it is very easy to control the pad and throw the ball to the other side of the table using simple speed on your smartphone. The harder you want to hit, the faster you need to slide. Well, there are two ways to serve the ball, in the first way you simply put the ball at the end, however, in other ways you turn the ball into the air with greater control in the direction.
