Flags with inappropriate flags as inappropriate have been working full-time with smiles working for less than a yearProsGreat Comfortable working environmentConsstill is working on organizing as it grows, but says it is inappropriate by improving the flag with inappropriate flags, and we are very proud of the benefits it can provide to our employees as well as the environment they help create. Our employees are passionate about shining in high quality workplaces every day. We are focused on strengthening our communication processes and we are recognized for this. Thanks for your comments. Positive work family atmosphere, very support and welcome immigrants. Many resources to help you in your work to achieve success. Everyone has a common goal and they work as one big team. Was this review helpful as it was recognized and celebrated success? Lead and organize charities and fundraisers for Operation Smile. I learned to lead fundraisers and work under pressure during public event organizations. Was this review helpful? Operation Smile is a great place to work. Especially for new developers. They offer great benefits and are very flexible. They have a great work-life balance. They are not particularly tech companies, so there is not much room to learn the latest technology. The biggest downfall I will say is. Did this review help? There are great benefits and fun inside activities and a great gym. There's not much room for growth or opportunity. Don't be afraid to reach other departments interested in joining - yes there will be negative stories around the office, but that won't set you back on career goals. Was this review helpful? I was an intern and had a great experience. The environment is flexible and comfortable to work with. The OSI team welcomed me as an intern as part of the team. Was this review helpful? Fun place to work with kids in need of laughter, enjoy a good time and forget about the problem. I would recommend anyone who volunteers here as an event coordinator. Was this review helpful? If you're interested in development and website management, this is a great place to work. Clean building and great lunch facilities. The whole mission is the best. Was this review helpful? A fun environment in a campus club, we can learn how to raise money for amazing causes. Learn how to make a difference across the U.S. and in the WorldFun environment to create new ideas that can make a positive difference.Campus Clubs Works For Free This review helped. It's a very fun and productive task tough, but they were able to help me. You learned how to update all the hardware and software for each computer. The hard part was trying to understand all the new equipment that was worked on. Helped all around and this review was helpful? Fun club by a pat Smile is a club with great intentions. They work hard to raise money for a big cause (for kids with cracked lips) and everyone who was part of this group was great. Was this review helpful? Despite my great experience as a credential and resource intern, I grew up as an individual despite working with the company for 4 months as an intern. The experience I gained in a short time had a big impact on me in a positive way. The staff are very friendly and openly communicating. Mistakes are used as a learning point, not as punishment. The company's work culture will be a true example for local and international companies and non-profit organizations. I highly recommend the company. Mistakes were helped by punishment, international connections, not vast learning points of skill? A productive and fun workplace environment surrounded by education and like-minded social consciousness. The management hierarchy is clear and there is room for growth, but it requires effort and decisions. Was this review helpful? A good environment for education I is a non-profit organization because I am an intern, so I may not get a job or get a job after an internship. The people I worked with are very nice and very friendly. I have full respect for the organization and love how they perform their medical duties. The hardest part of the job is unpaid training, it would be great because they want to hire someone with paid experience. I'm learning new stuff, so I enjoy my job and the location opens.I want to stay if I don't have the guarantee of unpaid inter training and post-training job. Was this review helpful? Good organizational skills, fundraising, I have 4 days with the dentist in surgery smile. I gathered a few students, participated in groups, and raised money to help children in remote areas near the organization mission site. The most enjoyable part of this medical volunteer is to get to know more people, help the kids and explore new places, get to improve my social communication skills.Free food, improving many different skills. Short break, always this East Sea this review was helpful? I love working for these people because they have a gysm that they've created and they start to smile and help them be happy... The only bad thing is the nonprofit, so I didn't get paid, but I definitely like it. Well children can be difficult to work with. Was this review helpful? This organization has helped me and my fellow students truly influence the community and raise awareness of children born with oral births. Was this review helpful? Good job, great cause. Very competent worker who always loves busy days, exciting and rewarding work, his work. Turnover, continuous restructuring. Did this review help? Family interviews in Mexico for research on genetic/environmental ingrology of clearly clea lips and palates • Use qualification test online data analysis software to get information from field interviews for statistical analysis, and create surveys for each new population; Collected samples, processed sensitive medical information, reviewed? Operation Smiley members. It is an organization in Penn State University that raises funds for diverged palate research. I was a member of Pennsylvania for two years. I recently graduated in May. I will attend the meeting and make semester payments to the organization. Was this review helpful? Help?
