Click on Description, then Download links hyperion launcher Pro is a very new launcher for Android. They were developed by the same group that developed the Substratum Theme Engine. The launcher is not just a home, it must be an experience. We believe that not only everyone deserves a sweet, feature-filled grenade launcher with a beautiful UX, wanted it to always be up to date with the best that Google can offer consistently, as well as consistently pushing new tweaks and customization options that users want... without bloating! We streamlined this launcher for ourselves; by introducing the best opportunities we love from the many launchers found in the market and creating a single experience, we can truly call this home. As usual, we have everything that a typical Launcher3/Pixel Launcher based launcher is, but much more! Launcher and accent theming: with intricately designed theme by Manuel Möllmann (Deep Darkness Theme) Drawer background; glow corrections and scrolling indicator color Dock background color Folder background color Search widget colors (Drawer/Dock) Smart widget colors Desktop, drawer and dock icon changes (icon size, label size, text color, text shadows, multiple lines) Create adaptive icon (Soon with multiple shapes pro!)
