## Pixel car racer pcru

Okay, all of us, PCRU stole information about yourself, or there's a virus that messes up your phone. If that's the case. Why didn't hell SF just sue Fill to make this mode? I mean, Fill just does his own mode. Mods doesn't make it legal? The thing is, WOWSKI was just a big jerk, informing everyone about misinforming. He just wants to be my cool friend who is not supercar mods but these mods, because that's all he does, they were photoshopped. He did them using Adobe Photoshop and other Adobe editors (WowSKIs bio ffs its). And therefore, he can't even do his own mode. If you are not stupid to blame Fill to make the mod then we trusted Fill in the first place. He just wanted pride in himself, and the virus thing is nothing more than fake information Wowski made. So don't be too stupid to fall for the false alarm, it's a virus my social network accoubts hack or my phone will be full of useless things that suck my phone. I'm sick of this fight because of the filling, just respect it. He just made this mode to make us happy, another update to SF and they were sick waiting to do other projects they were doing.
